JOE
CASEY

Joe's Journey

Started in Further Education:

Studied Level 3 Extended Diploma in Games Design

Joe Casey originally studied Level 3 Games: Art & Design at Henley College (prior to its merger with City College Coventry to become Coventry College).

Joe says that games have always been one of his passions, and being able to study how to make them helped him look forward to going into college for the first time following a difficult time at secondary school. He says; "I felt like I was not constantly being judged and instead I was welcomed with a friendly, creative work environment".

Crediting all the lecturers and fellow learners on his programme as amazing, he has high praise for his main teacher, Rob Lambert, who inspired his entire class to

go to University. Prior to this, Joe says he didn't have much direction in life and had no intention of going to University, but the skills and guidance he learnt during the programme helped him realise his passion to pursue study further.

Joe credits what he learnt on the programme at Coventry College as greatly helping him to achieve his First Class Honours Degree as he had the advantage of already learning software and theory. Following his graduation, Joe learnt of a role at Coventry College teaching the very class he loved so much during his time studying. Going from learner to teacher and help them to know things he wished he knew when he was their age.

Progression:

Lecturer in Games Design at Coventry College

STUDIED: **LEVEL 3 DIPLOMA IN GAMES DESIGN**

NOW: **GAMES DESIGN LECTURER**

I never would have thought that I would be in the position I am now, but I am extremely proud that I am.

CONFIDENCE

TRIPS AND EVENTS:

Esports events and tournaments

Learners can join the Coventry Crosshairs esports team, who made it to the semi-finals of the **2020 British Esports Association's Overwatch Tournament**, competing against 70 other colleges.

MCM Comic Con

A group of learners went to MCM Comic Con 2019, meeting other enthusiasts, seeing props and experiencing virtual reality brought to life.

Global Game Jam

Four learners took part in Global Game Jam in 2020, a 48 hour event to create a fully working game with other participants, promoting collaborative working rather than competition.

Annual Gamer Christmas

Every year learners and staff take part in a big Secret Santa and bring in consoles, food and drink on the last day of term. It's so popular that ex-learners return to celebrate with the Games department at their old college!

Special Effect charity

We take part in events with **Special Effect**, a charity that makes gaming accessible to people with physical disabilities.

Interactive Futures

Learners visited **Interactive Futures**, a conference for the UK games community, which was a great opportunity for them to network with professionals, experts and enthusiasts.
